Innovative and reliable solutions

- Instant restore at attractive prices for all size companies. Everyone does backup, we want our clients to be able to restore fast!
- Protection for both physical and virtual machines: all RDX clients will be protected with one solution
- Automated backup test for better application of the Business Continuity cycle
- Support and Sales teams in multi-language

What's happening once the licence expires?

Renew it to your distributor or renew the licence directly to NetJapan offices. End-users cannot renew their subscriptions directly with NetJapan.

As a reseller, when you register your end user with NetJapan, you are automatically reminded when the licence is about to expire and its renewal is fast.
